FEATURED SEMINAR OF THE MONTH:
Information Technology Bundle

12 CPEs | $595 (Member)

Organizations have never had a greater need for reliable assurance over technological capabilities. Digital transformation has offered a long list of benefits that contribute to the achievement of organizational objectives, and as such, internal auditors must be prepared to deliver assurance within the information technology space.

This Information Technology bundle will benefit IT and non-IT auditors alike, as it provides a comprehensive overview of the fundamental concepts of IT auditing. The bundle includes guidance into IT governance, general controls and change management, application security, insight into end-user computing and insider threats, as well as matters concerning organizational technology-related ethical issues, and more.
