Webinar Series

♦ November 15, 2016 - Auditing at the Speed of Risk

Jack Henry & Associates

Location: Springfield, MO, United States  
Position: Senior IT Internal Auditor

SUMMARY

The Senior Internal Auditor plans and executes complex information technology governance, cybersecurity and operational audits. Experience in payment systems, information security, application SDLC, or data center operations is preferred. The individual may serve as an auditor-in-charge, participate on engagements led by peer team members, or complete special projects. Focus is the identification of risk and collaborative development of mitigation strategies with business unit management who is responsible for implementation. Senior auditors are charged with completing a delegated audit plan, presenting observations to various levels of management, and authoring written reports. A successful candidate must be able to effectively multi-task, work with peers and management, meet deadlines, and demonstrate initiative.
